

# Furniture Options

## Finish

- **Poly:** Hand brushed water-based polyurethane that creates a protective shine to an already unique piece  
*\*note, all Aspen product tops are triple coated in poly for protection against scratches*
- **Wax:** Hand rubbed Beeswax/Linseed Oil creates a matte, natural soft appeal to any piece
- **Bronze Aspen:** Darker, richer wood tone with a proprietary blend that goes well with many décor styles  
*\*additional upcharge applies*
- **Golden Poly:** Hand rubbed Beeswax/Linseed Oil followed by hand brushed water-based polyurethane creates an enhanced glossy shine that glows
- **Custom finish** options available upon request

## Extra Gnarly

If you love the gnarly, knotty character of our most prized aspen wood, you may want to choose the *Extra Gnarly Upgrade*. In order to create these pieces, our wood suppliers comb the Rocky Mountain forests for trees that have grown and weathered in a particular way. This type of wood is rare, and when we create an Extra Gnarly piece of furniture, you know it is totally one of a kind! This extra-cost upgrade is available on most of our aspen Mountain Woods log furniture pieces, and may require additional construction time as each piece is custom created.

## Pine

Most of our log furniture pieces can also be built from blue-stain or clear pine instead of aspen. Blue-stain pine refers to the rich and attractive blue and gray hues that run through certain pine woods. This coloration is caused by beetles that attack and eventually kill the tree. Clear pine has a lighter color than aspen, and the knotholes are smaller.
